Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume LXIX

January 6 to June 30, 1917

McGRAW-HILL PUBLISHING COMPANY, Inc.
239 West 39th St.
NEW YORK CITY

INDEX TO VOLUME LXIX

January—June 1917

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest)

PAGES BY WEEKS

Jan. 6	1 to	44
Jan. 13	45 to	112
Jan. 20	113 to	160
Jan. 27	161 to	208
Feb. 3	209 to	256
Feb. 10	257 to	304
Feb. 17	305 to	352
Feb. 24	353 to	400
Mar. 3	401 to	448
Mar. 10	449 to	496
Mar. 17	497 to	544
Mar. 24	545 to	592
Mar. 31	593 to	640
Apr. 7	641 to	688
Apr. 14	689 to	735
Apr. 21	736 to	784
Apr. 28	785 to	832
May 5	833 to	880
May 12	881 to	952
May 19	953 to	1000
May 26	1001 to	1048
June 2	1049 to	1096
June 9	1097 to	1144
June 16	1145 to	1192
June 23	1193 to	1242
June 30	1243 to	1290

A

Accident Prevention:
——Central station's safety code for its public, 276.
——Electric bull's-eye to illuminate raised door sill, *1112.
——Honor awards for safety work, 629.
——Household electrical appliances, reducing hazards, 975.
——Industrial lighting, relation of to safety. By C. E. Clewell, *1153; comment, 1146.
——Motion pictures aid safety movement, *985.
——Prizes for safety appliances, 230.
——Reducing use of gasoline to safeguard workmen, 648.
——Safety rules for Wisconsin utilities, 575.
——Testing rubber gloves. By C. W. Ward, *920.
——U. S. safety rules (D.), 570.
Accounting:
——Accounting efficiency committee report, N. E. L. A., 917.
——Cost keeping for contractors, 433.
——Customers' records committee report, N. E. L. A., *915.
——Electrical manufacturers accounting and cost system, *1025.
——Lowering cost of handling central station accounts, 1013.
——Scientific cost accounting, constructive movement for, *17.
——Storeroom accounting, N. E. L. A. report, *916.
Actinium-uranium ratio in Colorado carnotite. By Karl H. Fussler (D.), 378.
Advertising. (See also central station business and displays.)
——Educative advertising campaign of St. Louis central station company, *1060.
——Effective advertising by Ohio central station company, *1114.
——Electrical advertising committee report, N. E. L. A., 905.
——Indirect publicity effective at Indianapolis, 369.
Agricultural needs of the far West; comment, 1097.
Air, electric strength and measurement of high voltages. By J. B. Whitehead (D.), 1024.
Allis-Chalmers Mfg. Co. 1916 earnings, 816.
Aluminum (D.), 974.
American Electrochemical Society, annual meeting, *936, 1022.
American Institute of Electrical Engineers:
——Annual convention, 676, 1025, *1256, 1270
——Boston section, joint convention with A. S. M. E., 667, 718.
——Midwinter convention, 235, 332.
——New York meetings, 1126.
——Nominations, *522.
——Officers elected, 981.
——Papers presented at special meeting, 1256, 1270; comment, 1244.
——Pittsburgh meeting, 119.
——Pittsfield section, address by Samuel Insull, 522.
American Society for Testing Materials, annual meeting, 1278.
American Society of Mechanical Engineers:
——Boston section, joint convention with A. I. E. E., 667, 718.
American Telephone & Telegraph Co., construction plans 1917, 528.
Antennas. (See Radio.)
Arc:
——Alternating-current arc. By C. D. Child (D.), 279.
——Arcs under pressure. By W. Mathiesen (D.), 930.
——Luminous efficiency of the radiation from the electric arc. By Enoch Karrer (D.), *191.
——Tungsten arc under pressure. By George P. Luckey (D.), 377.
Arc Lamps:
——Arrangement for indicating movement of electrode from focus, patent, 464.
——Bird's nest in, *987.
——Industrial arc lamps, data on. By C. E. Clewell, *1107.
——Slag preventive for, patent, 1202.
——Vacuous arc lamp, patent, 270.
Arkansas Association of Public Utility Operators annual convention, 1078.
Armature:
——Coils, manufacture of. By D. W. Perry (D.), 94.
——Extra copper losses in slot windings. By R. Richter (D.), 519.
——Part-slot, fractional-pitch windings. By C. A. Adams, 855.
——Part-slot, fractional-pitch windings. By Theo. Schou, *I, 500; comment, 499, II, *751.
——Windings, theory of. By S. P. Smith (D.), 1216.
Armstrong, Edwin H., awarded "medal of honor" of Institute of Radio Engineers, 979.
Associated Manufacturers of Electrical Supplies:
——Activities, 719.
——Annual meeting, 386, 427, 477, 524, 554; comment, 545; meetings, 768.
——"Better Business" slogan, 935.
——On war revenue tax, 977.
——Outlet Box section meeting, 810.
——Section meetings, 1031, 1269.
——Section officials elected, 1123, 1269.
——Standardization of trade literature sizes, 1280.
Atom, structure of. By Dr. Saul Dushman (D.), 1267
Atomic model. By R. R. Ramsey (D.), *618; comment, 595.
Automobile:
——Auto-starters, rating of (D.), 1118.
——Heater, electric, for engines, Metal Specialties Mfg. Co., *147.
——Reverse current relay, patent, 51.
——Starter, Westinghouse, *826.
——Starting and lighting equipment, Westinghouse E. & M. Co., 299.
——Starting batteries, Willard Storage Battery Co., *98.
——Engine testing, electrically, *557; comment, 547.
——Tire inflater outfit, Black & Decker Mfg. Co., 98.
——Tire inflation curb station, Black & Decker Mfg. Co., 299.
——Balancers for three-wire direct-current systems. By Thomas Carter (D.), 327; (D.), 569; (D.), *617; (D.), *663.

B

Baltimore Consolidated Gas & Electric Light & Power Co., ten years' growth, *1130.
Batteries:
——Grids for storage batteries. General Lead Batteries Co., *298.
——Plante plates, Gould Storage Battery Co., *47.
——Storage battery, Vesta Accumulator Co., 680.
——Storage battery, lead. By Ch. Ferry (D), 569.
——Test Clips, R. S. Mueller & Co., *680.
——Tungsten for, (D.) 141.
Boiler room:
——Losses due to combustible in ash, *1161.
Boilers:
——Clinkers in boiler furnaces. By Albert A. Cary, 267.
——Feed pipe, how water hammer was corrected. By T. W. Reynolds, *1260.
——Feed water, electrical method of testing. By Claude Charles Brown, *417.
——Feed-water heater, Whitlock Coil Pipe Co., *490.
——Feed-water heater platform. By T. W. Reynolds, *656.
——Feed water, methods for continuously testing, *133.
——Feed-water regulator, automatic. Kitts Mfg. Co., *994.
——Feed water, treatment of, 186, 897.
——Firebrick problems, 895.
——Furnace draft, apparatus for maintaining constant, *513.
——Furnace settings, method of constructing, 1064.
——Furnaces, thermocouples used in measuring heat, *1111.
——Hand-hole cap, Key Boiler Equipment Co., *872.
——Higher boiler pressures and temperatures, 803.
——Higher steam pressures and superheats, 896.
——Oil burners for carrying emergency loads, *272.
——Powdered coal as fuel, results with. By Henry Hull, 1105.
——Preheating furnace air, 224.
——Settings, high temperature insulation of, 718.
——Soot, effect of, on boiler efficiency, 562.
——Stokers:
Overfeed V-type, Detroit Stoker Co., *538.
Power dump for American Engineering Co., *536.
Stoker, remodeled to avoid buying new one, *707.
Book reviews:
——Annuaire Pour L'An 1917. Bureau des Longitudes, 380.
——Electric Central Station Distribution Systems. By Harry Barnes Gear and Paul Francis Williams, 619.
——Electrical Engineering. By Ernst J. Berg and Walter L. Upson, 379.
——Emission of Electricity from Hot Bodies. By O. W. Richardson, 281.
——Gas Engine Ignition. By Earle B. Norris, Robert K. Winning and William C. Weaver, 379.
——Handbook of Machine Shop Electricity. By C. E. Clewell, 571.
——Hydroelectric Power. By Lamar Lyndon, 665.
——Interior Wiring and Systems for Electric Light and Power Service. By Arthur L. Cook, 1268
——Laboratory Course of Practical Electricity for Vocational Schools and Shop Classes. By Maurice J. Archbold, 281.
——La Chimie des Elements Radioactifs. By Frederick Soddy, 379.
——Manual for Engineers. By Charles E. Ferris, 380.
——Mechanical Engineers' Handbook. By Lionel S. Marks, 474.
——Primary Batteries. By W. R. Cooper, 571.
——Principles of Electric Design. By Alfred Still, 380.
——Principles of Electric Wave Telegraphy and Telephony. By J. A. Fleming, 379.
——Principles of the Telephone. By Cyril M. Jansky, B.S., B.A., and Daniel C. Faber, E.E., 281.
——Radiodynamics. The Wireless Control of Torpedoes and Other Mechanisms. By B. F. Miessner, 281.
——System of Physical Chemistry. By William C. McC. Lewis, 281.

*Indicates illustrated articles.

312855

Book reviews: (Continued)
——Telephone Apparatus. By George D. Shepardson, 380.
——Transmission of Co-ordinate Paper. By Raymond S. Brown, 1268
——Underground Transmission and Distribution for Electric Light and Power. By E. B. Meyer, 571.
Boston:
——Boston Elevated Ry., financial relief planned, 287.
——Cost of conduit installed, 612.
——Edison Electric Illuminating Co.:
Engineering policy, 168; comment, 161.
Financial policies, 107.
Forms designed for telephone applications, *615.
Restoration of Edison differential, 49.
Street lighting rate arbitration, 626.
——Smoke abatement statistics, 675.
Buffalo steam station, construction and operating features, I, *170; II, *212; comment, 211; III, *308.
Bureau of Standards:
——Refillable fuses, investigation of, (D.) 233.

C

Cables. (See Wires, Wiring and Conduit.)
California oil resources, survey committee, 1226.
California power companies, comment, 1193.
California public utility development, 149.
California water problems, analysis of, 240.
Canadian Electrical Association, convention, 1172.
Canadian energy exported to the United States, 50.
Capacity of three parallel cylinders, electrostatic. By F. E. Pernot and E. N. D'Oyly, (D.) 1119.
Carbon brushes, contact resistance of. By R. Czepek, (D.) 972.
Central stations. (See also Hydroelectric Developments.)
——Arizona Power Co., new $1,000,000 plant, 53.
——Automatic generating plant. By J. H. Siegfried, *793; comment, 787.
——Baltimore Consolidated Gas, Electric Light & Power Co. ten years' growth, *1130.
——Baltimore, Md., and Lancaster, Pa., public service companies combined equipment makes for maximum efficiency. By J. A. Walls, *1056; comment, 1051.
——Barstow interests acquire West Virginia coal-producing lands, 770.
——Birchills, Walsal, England, power station. By L. Schueler, (D.) 854.
——Buffalo General Electric Co. Niagara River steam power station extension, *723.
——Buffalo steam station, construction and operating features, I, *170; II, *212; comment, 211; III, *308.
——Cambridge (Mass.) Electric Light Co. advertises patriotism, *1227.
——Columbus (O.) utility, extensive improvements, 431.
——Connecticut Power Co., growing business of, *1223.
——Connecticut Power Co., Housatonic Division, I, *404; comment, 402; II, *506.
——Effects of high costs on. By Herbert A. Wagner, *78.
——Equipment costs data, 800.
——Fall River (Mass.) Electric Co. plan connection with New England Power Co., *577.
——Fitchburg (Mass.) Gas & Electric Light Co. equipment costs, 800; joint line with Conn. River Transmission Co., 923.
——Generation and distributing expenses of a Middle West company, 88.
——German electric central station, (D.) 191.
——Holland, Mich., light plant rehabilitated without service interruptions, *459.
——Los Angeles aqueduct power system, 932.
——Middle West Utilities Co., earnings, 1275.
——Milwaukee Elec. Ry. & Light Co. acquires utilities, 1034.
——Montana Power Co. 1916 earnings, *817.
——Nebraska Power Co. acquires Omaha system, 1228.
——New England Power Co. extensions, *1274.
——1916 progress, 77.
——Northern California Power Co. replaces aluminum wire with copper, 578.
——Northern States Power Co. earnings helped by hydroelectric power, 723.
——Output and load factor of generating systems in America, 651.
——Pacific Gas & Electric Co. get Oro properties, 148.
——Pacific Power & Light drop plant. By J. H. Siegfried, *793; comment, 787.
——Philadelphia Electric to merge subsidiaries, 116.
——Pittsfield (Mass.) Electric Co. increase in power rates, 1033.
——Public Service Corporation of New Jersey, changes in organization, 670.
——Public Service Electric Co:
Coal supply serious problem, 722.
Essex station. By P. H. Chase, I, *124; comment, 114; II, *179.
——Rehabilitation without service interruptions, *459.
——Steam station design 1916, 74.
——Turners Falls Power & Electric Co. new plant at Chicopee, Mass., 860.
Central stations: (Continued)
——Washington-Idaho Company improvement plans, 725.
——Washington Water Power Co., annual report, 1223.
——Wisconsin, plans for new stations, 626.
——Wisconsin power properties purchased, 389.
Central station business: (See also merchandising methods.)
——Abingdon & Rockland (Mass.) Electric Light Company, customer growth and service extension, 228.
——Accounting committee reports, N. E. L. A., *917.
——Advertisements used to good effect by Ohio company, *1114.
——Advertising advantages of electric service, Duluth Edison Elec. Co., *1019.
——Analyzing growth of central station load. By W. S. Leffler, *361; comment, 355.
——Apartment range load, characteristics of, *709.
——Appliance campaign, Byllesby properties, 1164.
——Appliance campaign co-operative, in Indiana, 91.
——Appliance load increases revenue, 139.
——Appliance repairs free, 796; comment, 787.
——Appliances free for salesmen conducive to larger business, 1066.
——Auditorium and model kitchen, for free use of women's clubs at Ithaca, N. Y., *38.
——Baltimore customers hold 13,000 shares of company stock, 92.
——Battery charging valuable off-peak load, *1196; comment, 1193.
——Battery exchange service at Hartford, Conn., *788, 851; comment, 834.
——Billing chart, 660, 1021.
——Boston Edison Co., commercial and engineering policies, 71.
——Campaigns, "off" conditions due to insufficient preparations, 756.
——Central station load, comment, 113.
——"Cheerfulness creed" for company representatives, *39.
——Chicago apartment-house customers, increase in energy consumption, *375.
——Cleveland Electric Illuminating Co. gets railway power contract, 102.
——Cleveland Electric Illuminating Co. increases power rates, 934.
——Coal cost governs power contract of central stations, 766.
——Coal costs of small utilities in Middle Western States, 935.
——Collecting $50,000 after records were destroyed. By C. Erwin, 710.
——Columbus (Ohio), co-operation in the electrical industry, 573.
——Combined block and room rate for small town, 1265
——Commercial department equipment, United Gas & Electric Engineering Corp., *1164.
——Commercial expansion, opportunities for, 838.
——Commission paid employees on appliance leads, *661.
——Commonwealth Edison Co., additions to load 1916, 276.
——Company's sign precedes launching of sign campaign, *93.
——Compensating employees for leads, 1067.
——Compensation of salesmen committee report, N. E. L. A., 909.
——Contract card showing motor listings. *1212.
——Cooking load in small towns, development of by Illinois Northern Utilities Co., *420.
——Cooking load in West, 805.
——Cooking rate, justification for, 849.
——Co-operation with jobbers, 576.
——Customers as "load builders," *804.
——Dayton (O.) Power & Light Co., earnings 1916, 481.
——Delinquent accounts, method of collecting. By Lewis A. McArthur, 1007.
——Density of business and cost of service, relation between, 228.
——Denver company "good service" departmentt, *469.
——Development of small central station business, 838.
——Electric vehicle as a central station load. By C. A. Rohr, (D.) 1119.
——Electric vehicle business, plans to develop, 334.
——Electric vehicle promotion, 818.
——Electrical show in a town of 8000, 140.
——Electricity thieves, how to detect and deal with, *1004; comment, 1001.
——Electrothermal processes requiring low temperatures, (D.) 1022.
——Energy earnings and output, October, 1916, *32; November, *223; December, *410; January, 1917, *654; February, *844; March, *1061.
——Energy return on electric vehicles in the U. S., 373; comment, 353.
——Equipment contracts, points on, 421.
——Fall River (Mass.) rates, 857.
——Farm-line business in Kansas, 39.
——Financing house-wiring contracts defended by Boston Edison Co., 71.
——Flags presented to schools by Alabama Power Co., *667.
——Flatirons kept in use after purchase in one Southern city, 139.
——Forms designed for telephone applications, *615.
——Free appliance repairs in St. Louis, 374.
Central station business: (Continued)
——Fuel prices argument in power sales campaign, *138.
——Garage business for the central station, an interview with Thos. A. Edison, *29.
——Gas-engine competition met on a basis of motor-operating cost. By M. W. Ehrlich, 38.
——Gasoline stoves electrified, *138.
——"Getting acquainted" with new power consumer, 422.
——Growth and rate reduction, I, *173; II, *217; comment, 210.
——Hartford (Conn.) battery exchange service, *788, 851; comment, 834.
——Helping power customer avoid waste of power, *470.
——High cost of living as an electric range argument, *1165.
——High price of scrap metal an argument for central station, service, *137.
——Hotel cooking load, human factor in. By Frank B. Rae, Jr., *601.
——House-wiring campaign, Iowa Ry. & Light Co. By Arthur Huntington, 1207.
——House-wiring contracts, intensive solicitation of, 927.
——House-wiring demonstration, co-operative, 40.
——Humanizing the central station. By C. A. Magee, 757.
——Increasing the net revenue, 187.
——Industrial load, effect of increasing, 1164.
——Isolated plant costs and central station service, comparative data, 1020.
——Lamp policy predominating, *969.
——Lamp salesman's profit to company, 1116.
——Large-scale appliance purchasing, policy of, 927.
——"Less than minimum" consumer, service to, 516, *927.
——Lighting load, possibilities. By Wm. A. Durgin, *356; comment, 402.
——Louisville (Ky.) Gas & Electric Co. 3-cent campaign, 1263
——Lower power rates to attract industries. By F. Emerson Hoar, 1014; comment, 1003.
——Mailing New Year resolutions to house-wiring prospects, *93.
——Making customer understand the meter. By Frank Wert, 176; comment, 161.
——Memphis' 600,000 kw.-hr. vehicle load, *551.
——Merchants' Heat & Light Co., Indianapolis, moving office to Main Street profitable, *1212.
——Meter department uniforms, *711.
——Meter reading as a start for young men, 1114.
——Meter record file on wheels, *1115.
——Minneapolis General Electric Co.'s electrical dinner, *613.
——Narragansett Lighting Co. electric shop, 386.
——Negotiating a street lighting increase, 149.
——Newspaper publicity, prizes for, 566.
——Off-peak load in battery trucks, great possibilities, *692; comment, 689.
——Off-peak load, necessity for increasing, 926.
——Operating costs and rates, comment, 1001.
——Opportunity to encourage patriotic display, *756.
——Pacific Gas & Electric Co., changing from flat rate to metered service, 187.
——Placing the engineer of the superseded isolated plant, 92.
——Policy changes explained to public before going into effect, 1263.
——Poor lighting promotes public ownership. By C. E. Clewell, 644; comment, 643, 855.
——Power contract with coal clause, *1120.
——Predominating lamp policy, *969.
——Public service man in civic life, 850.
——Public Service Company of Northern Illinois, earnings 1916, 481.
——Publicity problems, comment, 642.
——Pumping load, small, desirable. By Gilbert Rutherford, 475.
——Range campaign, Erie, Pa., *468.
——Range campaign in town of 3500, *275.
——Range campaign of St. Louis company begins with employees, 517.
——Range manufacturer and central station co-operation between, 906.
——Range sales dependent on interdepartment co-operation, 1066.
——Range standardization, 905.
——Reducing delinquent accounts by daily reports, *1067.
——Refrigeration, mechanical, load, 804.
——Relation of income to investment, 468.
——Rising costs halt rate reductions, *843.
——Rural service, data showing costs, 613.
——Rural service found unprofitable by Indiana company. By Alex. R. Holliday, 422.
——Rural service profitable in Wisconsin, 565.
——Rural service that paid. By A. Hardgrave, *647; comment, 642.
——Safety code for customers, 276.
——Salary plus commission form of paying salesmen best, 806.
——Sale of service in large quantities. By Peter Junkersfeld, *9.
——Sales force betters public relations, 277.
——Salt Lake City electrical interests prepare ordinance, 229.
——Saving net earnings, comment, 209.
——Scrap material, utilization of, 795.
——Selling fans on deferred payments, advantages of, 756.
——Selling securities to employees and customers, 1057.
——Selling stock to consumers successful, *138.

*Indicates illustrated articles.

Central station business: (Continued)
——"Service chats" with the customer. Union Electric Light & Power Co., *189.
——Service crew, Illinois Traction Co. By E. E. Soules, *659.
——Service slogan of a Michigan central station, 140.
——Shawinigan Water & Power Co., 1916 power business development, *627.
——Small-company executive and new business, 137.
——Small-town electric service, data on, 140.
——Steam-heating problem, 614.
——Stocking of motors prontable, 1021.
——Successful customer policy, *323.
——Texas lighting standards raised, 516.
——Transmission lines to service small towns, 758.
——Trial motor applications, 566.
——Turners Falls Power & Electric Co. to furnish energy to Springfield (Mass.) Railway, 819.
——Union Electric Light & Power Co., St. Louis, newspaper advertising campaign, *1060; stock sale, *977.
——Washington (D. C.), "all-electric," apartment building, *322.
——Water heating load, development of in West, 805.
——Wiring department, is it justifiable? By Earl E. Whitehorne, 548.
——Women successful central-station solicitors, 1068.
Central station operation. (See also Boiler-room):
——Accident due to incorrectly set brushes. By R. L. Hervey, 90.
——Adequate steam reserve capacity, 168; comment, 161.
——Balanced draft for emergency needs. By Albert Martineau, 924.
——Blueprints filing cabinet for, *563.
——Bonus system based on coal consumption per kilowatt-hour output, 1260.
——Buffalo steam station, constructing features, I, *170; II, *212; III, *308.
——Canadian crisis, comment, 1145.
——Centralizing energy production from fuel, comment, 1195.
——Changing from direct to alternating current system, 661.
——Changing lines to suit the load, 162.
——Circulating-water suction line. By G. T. Shoemaker, *925.
——Cleaning turbine blades and condenser tubes. By F. C. Chambers, *467.
——Clearing head-gate racks, *741.
——Coal cost and shortage, 478; comment, 449; comment, 546.
——Coal economy tests, 1160.
——Coal-handling methods, *895.
——Coal selection based on the fusibility of the ash, 1112.
——Coal storage installation built by United Electric Light Co., Springfield, Mass., 1111.
——Coil winding machine. By J. S. Mills, *658.
——Condensing water supply problem, solution of, *1260.
——Coupling, flexible. By Leonard A. Doggett, 185.
——Decreasing fuel used per kilowatt-hour, *610.
——Distribution. Listed alphabetically.
——Drying generators, 924.
——Dusting concrete floors, 846.
——Dynamiting foundations inside the station, 1162.
——Fiber brushes for cleaning condenser tubes, *87.
——Fuel conservation best accomplished by using all available water power, 1125.
——Fuel problem, 336.
——Fuse rack, *1211.
——Grounds on consumer's circuits, text to detect, 37.
——Heater for sub-station office, *847.
——High-potential and ground tests on customers' circuits, *320.
——Higher boiler pressures and temperatures, 803.
——Hold-off tag on high-tension work, *801.
——Hydraulic conditions, study of, to operate plants to best advantage. By W. J. Wadsworth, *464.
——Ice jams, trolley boat to prevent. By Raymond Frances Yates, *370.
——Inferior oil circuit breaker causes $30,000 damages. By R. I. Elkin, 381.
——Inspection schedule used by Ohio company, *564.
——Isolated plant and central station co-operation, 770.
——Lightning, analysis of damage caused by. By C. W. Piper, 609; comment, 593.

Oscillating-current circuits, mathematics of. By V. Bush, (D.) 713.

P

Pacific Gas & Electric Co.:
——Acquire Oro properties, 148.
——Annual meeting, 1081.
——Big Bend project, 1081.
——Changing from flat rate to metered service, 187.
Patent matters:
——British tungsten lamp patent decision filed, 70.
——Enemy-owned patents, bill to license use of 1120.
——Patent office work handicapped, 330.
——Status of patents during war, 764.
Patents:
——Adjustable electrolier, *702.
——Arc electrodes for indicating movement from focus, 464.
——Capacity meter, direct-reading, 746.
——Conductors for pulsating currents, *219.
——Conduit molding, metallic, 1255.
——Cooled nitrogen filled lamp, 221.
——Cooling variable-speed motors, *600.
——Corona effects as protection against line surges, *219.
——Duct bushing, flexible, *463.
——Generator, variable-speed type, *1010.
——Incandescent lamp with ribbon filament, *178.
——Indicator for crest voltage measurements, *556.
——Insulating barriers for use with transformers, 1252.
——Lightning arresters, 1055.
——Lightning arrester, scheme for, *369.
——Measuring instruments for finding transformer losses, *702.
——Measuring magnetic drop, 745.
——Mercury arc rectifiers, 1252.
——Potential transformer for direct current, 132.
——Quenched-gap method of opening heavy alternating current, 462.
——Radio patents, December, 1916, *160, January, 1917, *352, February, *544, March, *784.
——Rectifier, vibrating-type, 1055.
——Relay, reverse current type, *51.
——Resistance unit, open, *550.
——Rotary converter, connections for starting, *1110.
——Slag preventive for flame-arc lamp, 1202.
——Sound transmitter, subaqueous, 745.
——Synchronizing circuits, *600.
——Transformer thermo-protective devices, *363.
——Vacuous arc lamp, 270.
——Water-heater, electric, *1013.
——Water rheostat, *172.
——Wireless ammeter, 798.
——Wireless transmission, oil-immersed key for, 922.
Permeameter for magnetic-mechanical testing. By Frank P. Fahy, *315; comment, 307.
Phase rotation. By C. J. Fechheimer, (D.) *618.
Phase rotation, determining. By W. V. Lyon, *968.
Phase rotation, simple method of determining. By T. W. Varley, *466.
Phase transformation. By G. Faccioli, (D.) 1118.
Philadelphia:
——Daylight darkness, Philadelphia Electric Co. equal to emergency, *722.
——Electric Storage Battery employees raise flags, *819.
——"Light up Philadelphia," *859.
——Philadelphia Electric to merge subsidiaries, 116; rate case, 771.
Phosphor-bronze wires, electric properties of. By A. J. Oehler, (D) 44.
Photoelectric cells, variation of the wave-length sensibility with time. By Herbert E. Ives, (D.) 142.
Photometry:
——Apparent brightness; its conditions and properties. By Leonard Thompson Troland, (D) 326.
——Hue difference and flicker photometer speed. By Herbert E. Ives, (D) 95.
——Of lights of different colors (D) 1117.
——Photoelectric cell as a photometer. By James R. Randolph, (D) *1166; comment, 1146.
——Photometer. By H. E. Howe, (D) 44.
——Photometer sight box. Leeds & Northrup Co., *146.
——Photometric measurements. By F. K. Richtmyer and E. C. Crittenden, (D) 424.
Pipes and piping:
——Circulating-water suction line. By G. T. Shoemaker, *925.
——Corrosion caused by air in water. By H. A. Holmes, *319.
——Drive head that protects pipe thread, Fargo Mfg. Co., *587.
——Electric heater for pipes, *707.
——Overhead pipe supports, 1017.
——Pipe straps, Central Distributing Co., 1091.
——Standby equipment, maintenance of, 968.
——Steam heating service improved by changes in boiler piping, *89.
——Steam velocities, 896.
Platinum:
——Refining in 1916, 866.
Plugs and receptacles:
——Cord protector switch plug for electric irons, Hotpoint Electric Heating Co., *634.
